PLACEMENT FUTURE GOAL (2024-2028 Year)

TBI plans to achieve a placement goal of 70%. This goal assumes the college will enroll a higher number of Title IV eligible students. The college will make concerted efforts to increase its U.S. domestic enrollments thus providing the college an opportunity to have more graduates eligible to work in United States available for placement. The college will also revise its predictions at the conclusion of 2023-2024 year and will establish placement goals for the next 3 to 4 years.
