PLACEMENT FUTURE GOAL (2025-2026 Year)

TBI plans to achieve a placement goal of 70%. This is a conservative goal based on the recent historic trends in enrollment and fewer graduates eligible for placement from the college's associate degree programs. The college will make concerted efforts to increase its U.S. domestic enrollments thus providing the college an opportunity to have more graduates eligible to work in United States available for placement. The college will also revise its predictions at the conclusion of 2025-2026 and will establish placement goals for the next 3 to 4 years.
